PROFILE

I am passionate about Technology and Innovation, with the ability to meet the objectives and needs of the client. I work as a Software Developer, primarily focused on Front End development with over 9 years of experience in web application development, using **Javascript, Typescript, CSS, HTML, React, Next, Vue, Nuxt, Angular, Tailwind, Material UI**, and integration of **RESTful APIs**. I am familiar with **version control** usage, **responsive design**, problem-solving, and agile methodologies.

WORK EXPERIENCE

Company: Baufest (01/2022 –03/2024)

Position: FrontEnd Developer Senior

Project: Opening massive salary account for Interbank bank.

- I implemented an MVP to automate the mass creation of salary accounts, allowing the client to self-serve.
- I participated in the implementation analysis, provided suggestions in the design, service integration by consulting Swagger, and attended various agility ceremonies.

Technologies: *Angular, Typescript, GraphQL, CSS, HTML, Swagger, Jira, Git, JIRA, Bitbucket.*

Project: Extracash + line increase for the interbank bank

- A module was implemented for bank clients, offering them extra cash and a credit card limit increase.
- I participated in the module implementation, integrating services by consulting Postman and attending various agility ceremonies.

Technologies: *Angular, Typescript, GraphQL, CSS, HTML, Postman, Jira, Git, JIRA, Bitbucket.*

Project: Galicia Bank.

- I implemented a module to visualize the sales of small merchants who use a QR code for their sales transactions.
- I participated in the analysis and implementation of the module, integrating services by consulting Swagger and attending various agility ceremonies.

Technologies: *React.js, Next.js, TypeScript, Redux.js, GraphQL, Swagger, HTML5, CSS, JavaScript, Git, JIRA, Bitbucket.*

Company: Entelgy (02/2021 –01/2022)

Position: FrontEnd Developer Senior

Project: BBVA Mobile Application

- I performed maintenance and implemented modules such as service points, promotion points, among others.
- I participated in the creation of new modules, service integration, implementing unit tests, integration tests, and End-to-End tests. I also took part in various agility ceremonies.

Technologies: *Lit-Emement, Javascript, Janus, Jazmin, CSS, HTML, Postman, Jira, Git.*

Company: MDP (11/2020 –02/2021)

Position: FrontEnd Developer Senior

Project: Landing page Interbank person.

- I implemented and maintained new sections of the landing page for Banco Interbank individuals.
- I participated in the implementation of the module, integrating services by consulting Postman, and attending various agility ceremonies.

Technologies: *Angular, Typescript, GraphQL, CSS, HTML, Postman, Jura, Git, JIRA, Bitbucket.*

Company: AFP Habitat Perú (08/2019 – 09/2020)

Position: Product Owner and FrontEnd Developer

Project: Mi Habitat Digital

- I migrated the administrative platform of the clients from PHP technology to React.js.
- I led the project entirely. I participated in meetings with different departments for requirement gathering and suggestions. I implemented the designs of the new platform. I integrated RESTful API services and participated in various agility ceremonies.

Technologies: *React, JavaScript, HTML5, CSS, Git, JIRA, Bitbucket.*

Project: Cámbiate a AFP Habitat

- I led the project for the implementation of the transfer of Afps using facial recognition.
- I analyzed the technologies to be used, evaluated providers for development, participated in meetings with different departments, and in agility ceremonies..

Technologies: *Azure, Google Stack.*
